also a great influence in strengthening the antiannexation taction, the necessity being escaped of
annexation to self preservation.

Mr. Buchanan scratches his ear at the statesmanlike views o Bransh pulitical economy as set
forth by zir Robert Peci. He anticipates with
great sugacity the contagion of tariff reductions
upon the protection afforced to Pennsylvania iron
of 1842. And you may rely upon it, the turiff will
make the next session of Congress memorable in
the history of the country. It will be reduced;
and among other items, it will be reduced upon
Pennsylvania iron.

Philadelphia. [Correspondence of the Herald]

Philadelphia, March 26, 1845.
This is truly March weather—cold and blustering, with a sky occasionally obscured by clouds, and the sun making desperate, and as yet partially successful efforts,

to impart warmth to the chilly atmosphere.

In the course of the numerous slarms of fire which have happened in this vicinity, the firemen have indulged themselves in one or two bouts of their favorite amuse.

In the course of the numerous alarms of fire which have happened in this vicinity, the firemen have is dulged themselves in one or two bouts of their favorite amusement, and the contagion has extended to their hangers on. We see occasional displays of pugilism as we walk the streets, more particularly in Southwark, and from the spirit manifested, I am inclined to believe that the most rowdy portion of the natives in that district conceive that they can afford another riot the coming summer on the strength of their 1150 anjority.

The Supreme Court was engaged all this morning in hearing an argument, on a writ of error, in the case of semuel Zaphon, a negro, who is now under sentence of deeta for the murder of an oid black man called Cuffy Ted. The murder was of the most atrocious kind having been perpetrated for the purpose of taking the \$500 or \$400 in money which it was supposed the old man had in a possession. The execution has been respect to which has bost rised and sentenced. It appears that the inductment was found in Oyer and Terminer, the judges of which are also judges of the Quarter Sessions, and the president judge was not on the bench at the trial, which is required by the Constitution of the State. It is the general opinion that the judgment of the Court below wall be reversed, in which case all the convictions in the Ke. sington riot cases, of murder in the second degree, being in the same predicament, must be reversed also. These difficulties arise from the manner in which our legislatures have tinkered with the criminal tribunals of the city and county—setting up one court and then abolishing it to set up another—legislating one set of Judges off the bench for the purpose of purting others on this these difficulties arise from the manner in which our legislatures have tinkered with the criminal tribunals of the city and county—setting up one court and then abolishing it to set up another—legislating one set of Judges off the bench for the purpose of purting others on the billy account of the ci

The theatres are doing a smashing business. The circus was crowded last evening, so was Burton's theatre, and also the Ethopan Opera House, and the Chesnut st. The Arch street had the corps of National Grays in their new and splendid uniform at the performance last evening. Texas, or the Massacre at the Alamo was the afterpiece, in which Golonei Crockett is the principal character, and is made to pile Mexican soldiers on the stage in the style till killed off himself. To night Burton's piece of the "Three stages of loading," in which the principal characters are borne by Burton himself, and Knight is to be brought, and Colonel Crockett is to die; in the afterpiece of Fexas, for the last time, as is said, at this theatre.

The closing quotations of the stock market are given below. It was see perceived that State os maintain their position. Girari Bank shares have advanced, and there is an improvement in Winnington Raitroad 6s. The other stocks are as shifting as the wind, except those of real value.
